

Field Trip Report Instructions
EPSc 413 Introduction to Soil Science
Due in Class, April 5, 2017

After the field trip to Tyson Research Center you are required to write a **0.5 to 1 page report** about the trip. You may discuss any or all aspects of the trip as long as these pertain to soils. The exact content is up to you, but must be relevant to our class. The key requirement is that you think about the trip and write something that demonstrates what you learned. You do not need to format this report in a special way or do any research.
